

Mid-2

University of Barishal

Dept. of Computer Science and Engineering

Course Code: CSE-2107; **Course Title:** Object Oriented Programming

Session: 2019-20; **Exam:** Mid Term-II **Marks:** 20; **Time:** 01 Hour

1.	Describe the purpose of Java's wrapper classes, that is, what they provide to programmers that their underlying values can't provide?	3
2.	List some of the most common types of exceptions that might occur in Java. Give examples.	3
3.	Distinguish between: i) InputStream and Reader classes ii) OutputStream and Writer classes	4
4.	The Collections class of Java Collection Framework has several methods (e.g. sort(), min(), max()) that require natural ordering of the classes to be handled. Explain the two possible conditions that must be satisfied on the classes to be able to use the sort() method to arrange the list of objects these classes.	4
5.	Threads can be used to make your Java applications faster. They allow you to run multiple things at the same time. You must think of a good scenario for using threads in real-world and discuss your scenario.	6
